

24v inverter three phase

Overview

These are rugged, industrial grade 3-phase pure sine wave DC/AC inverters, 24V, 48V, 125V or 250VDC inputs available. 115VAC or 230VAC or 3000 watts. Used in solar power, telecom, commercial marine, steel mills and military applications. PV Input Voltage Range: Up to 450Vdc for flexible solar panel compatibility. 9% efficiency with a max current of 22A. Discover. The power inverter can convert 24V DC to 110V/120V or 220V/230V AC. Pure sine wave output exactly duplicates mains power. Neutral point is grounded--Ultra quiet with no electrical interference. The exclusive modular system architecture means that increased power output is just an additional FXR inverter/charger away. Available in sealed or vented units. Its many features include a true sine wave inverter, adaptive charging, hybrid PowerAssist technology plus multiple system integration features such as three or split phase operation and parallel operation.
