

Backpack photovoltaic panels

Overview

Solar backpacks are designed for outdoor use and feature one or more small photovoltaic (PV) cells that utilize energy from the sun in order to charge devices such as smartphones, tablets, cameras and other USB-enabled gadgets via built-in connectors. I've tested dozens of backpack solar panels and found the top performers deliver 14-60 watts with 23-25. The BigBlue 30W offers fast USB-C charging at 1.76 pounds, while the FlexSolar 60W provides laptop-sized portability with multiple ports. For ultralight backpacking, the ZeroKor 22W at. After running 12 different panels through real-world conditions including cloudy days, high altitude, and everything in between, I've learned that advertised wattage tells only half the story. This guide breaks down the best options for hikers, focusing on durability, weight, and charging. Finding the best solar panels for backpacking is no longer just a luxury—it's a smart way to stay connected and powered up while exploring the great outdoors.
