

Does Managua have solar air conditioning

Overview

Solar powered air conditioning is a satisfying thing to experience. Imagine yourself cooling out in climate-controlled luxury, while the bright sun floods a tropical wonderland outside, and you are feeling great all the while because you get to use the power of that same sun to stay cool and dry! Complete. Within this context, as we began planning and developing Big Sky Ranch Nicaragua over the last two years, we realized there was an opportunity. The Big Sky Ranch Nicaragua design architect, Karin Eigner, has practical experience in designing buildings that have low energy. Ultimately we arrived at the design below that we are building into our first residential units now. 1. Sun on: Roof Mounted Solar Cells -> Charge Batteries -> Inverter converts to AC voltage (110v) -> Power your regular (but efficient) home appliances. 2. Sun. When you break it down, the energy consumption needs of a modern ranch home in the tropics are dominated by the air conditioning.
