Frequently Asked Questions

How much does a home standby generator cost?

On average, the total cost for a professionally installed home standby generator (for a typical 2000-2500 sq. ft. home) ranges from \$9,000 to \$16,000. This range can vary widely based on your home's size, your power needs, and local labor rates. Let's break down where that money goes. The generator itself.

How much does a generator cost?

Prices depend on the size, type, fuel source, brand, and accessories. A whole-house natural gas generator costs \$3,000 to \$6,000 to power an entire home up to 3,000 SF in size while a liquid propane generators cost \$2,000 to \$6,000 for the unit alone. Whole house diesel generators cost \$5,000 to \$18,000.

How much does a whole house diesel generator cost?

Whole house diesel generators cost \$5,000 to \$18,000. Installs to a home's existing gas line and require no fuel storage. Lasts longer and burns cleaner than other fuels but is more expensive and requires a large storage tank.

How much does a Generac Generator cost?

Generac generators cost \$2,000 to \$5,000 for a 7 to 24 kW whole-house unit, plus \$3,000 to \$5,000 for installation. Generac's standby generators turn on automatically during power outages and run on natural gas or liquid propane. Generac is the leading brand in whole-home generators.

How much does a generator cost in 2025?

According to HomeAdvisor, the typical cost of a whole-home generator so far in 2025 lands between \$1,538 and \$8,818. One of the biggest factors in the price of a generator is how much it will have to power, typically measured in kilowatts.

How much power does a generator use a day?

According to the US Energy Information Administration, the average American household uses just short of 900 kilowatt-hours per month, about 30kWh per day. Typically, generators with 20kW of capacity are considered whole-home generators and cost more. If a generator has less than 10kW of power, it's meant for smaller jobs and will cost less.
