

Huawei's solar outdoor power cabinet reform measures

Overview

The one-module variant measures 590 mm x 255 mm x 510 mm and weighs 80 kg, while the three-module system measures 590 mm x 255 mm x 1,230 mm and weighs 216 kg. The new storage systems have an operating temperature range of -20 C to 55 C and are IP66-rated. Intelligent power generation: intelligent peak. Replacing multiple cabinets with one, achieving whole-link intelligence. One cabinet per site is sufficient thanks to ultra-high energy density and efficiency. One cabinet is able to suit current needs and expand as required access/aggregation/core equipment. Under TTCL Project PH8, Huawei 2025 is implementing cabinet installations for rural sites. Each cabinet is equipped with:

- BBU (Baseband Unit) – for site operation and connectivity.
- Power modules – to ensure continuous power supply for running the site.

Q&A Q: What products do you supply?

A: We supply embedded power systems, rectifier modules and batteries from Huawei, Emerson, and ZTE.
