

Light Valley Solar Power Generation

Overview

Light Valley Solar is a proposed 500MW solar farm with battery storage near Selby, North Yorkshire, designed to power approximately 115,000 homes annually. A 500MW grid connection to the transmission network has been secured. The proposals include five sites where solar panels could be installed, located between Monk Fryston, Hambleton, Eggborough and Escrick. We deliver renewable energy solutions that create lasting value for the communities we serve, protecting the environment while fostering economic growth and energy.

1. 1 Light Valley Solar Limited (the Applicant) is seeking a Development Consent Order (DCO) for the construction, operation and maintenance and decommissioning of Light Valley Solar (hereafter referred to as the Proposed Development).

- The project includes a total of seven Solar Development Sites totaling 900 hectares (ha).
