

Netherlands electric vehicle market

Overview

The Netherlands remains one of Europe's leading markets for electric vehicles (EVs), with high penetration of battery electric vehicles (BEVs) and continued growth in plug-in hybrid electric vehicles (PHEVs). As the share of electric vehicles in the Dutch car fleet increases, the industry organizations BOVAG and RAI Vereniging report. A total of 388,024 cars were registered, up 1.7 percent from the previous year. 3% increase compared to December 2023. This represents an impressive year on year increase of 27 percent. In October 2025, fully electric cars accounted for over 40% of new registrations in the Netherlands. The growth is partly driven by upcoming tax changes.
