

New Low-Temperature Type Lithium Battery Cabinet for Workshops

Overview

New generation lithium-ion battery storage cabinets are engineered to provide exceptional fire protection. Featuring double-sided insulation and robust construction, these cabinets are designed to withstand extreme heat and prevent fire from spreading to surrounding. A lithium ion battery cabinet is a specialized protective enclosure engineered to reduce the safety risks associated with lithium battery storage. As their use expands across sectors, so do the risks associated with improper handling, charging, and storage. These cabinets feature self-closing, oil-damped doors and triple hinges for maximum structural endurance. They are constructed with a powder-coated steel body and integrated. Lithium Ion Battery Storage Cabinet LBSC-A10 features an 18 L sump for compact battery containment. It includes five durable shelves, each designed to support up to 75 kg of weight. The battery electrodes (anode and cathode) and the electrolyte contain lithium ions.
