

Personal UPS Uninterruptible Power Supply

Overview

At PCGuide we know power – yes we keep things switched off when not in use – and we know how underserved so many technology users are. So we've picked the best options for a range of use cases, drawing on our in-depth topic knowledge of both power supplies and PCs in general to separate the chalk from the cheese. If you refuse to settle for anything less than the best, the APC Back-UPS PRO 1500VA is the right uninterruptible power supply for you. Its 1500VA/900W capacity should be more than enough. An important factor to consider when buying an uninterruptible power supply is its software. Every uninterruptible power supply we've listed provides the software you can use to monitor the UPS. If you're a PC user, this software can also be used to automatically shut down. The acronym UPS stands for Uninterruptible Power Supply. Essentially, if the power goes out, your devices shouldn't do. This allows you to shut down and save work or.
