

Pure sine wave inverter 72 to 220

Overview

The SWP2000-DA72 is an inverter that converts a DC voltage from 72V to 230V AC alternating voltage (pure sine wave) and can supply an alternating current and a continuous power of 2000W. Pure sine wave exactly duplicates household current. Thermostatically controlled fan comes on only when needed. This means that this inverter supplies the same type of voltage as the wall socket. Below you. Pure sine wave inverter: 48 V 60 V 72 V DC to 220 V AC, provides 7000 W, 8000 W, 9000 W, 12000 W, 15000 W, 20000 W peak power. Advanced Pure Sinus Wave Technology provides a high quality AC current with the mains current, which is very important for inductive loads that require a high current. The transformer-isolated Galaxy Series Rugged Inverters are designed for harsh environment, military, and rail applications, and feature an optional advanced Internal Suppression Filter Network (ISFN) to suppress the significant transients usually associated with these types of conditions.
