

Solar Photovoltaic Panel Maintenance

Overview

Solar panels generally require very little maintenance in order to function, so yes, you can usually just let them be. The only thing most solar panels need is a periodic light cleaning to make sure dirt, leaves, and other debris aren't obstructing the sun's rays. You may also want to check underneath the panels for. If your panels' energy output starts to decrease, you can monitor it via an app. Lower energy output could be a sign that your panels are. If your panels are tilted, you're in luck: rainfall will actually clear away debris that's accumulated on them. However, during the dry season or. If your panels need to be repaired or replaced, it's best to hire a professional. If they're losing efficiency and still under a performance or power output warranty, then call the. Solar panels are designed to be durable. Top-quality solar panel installations allow PV systems to withstand all kinds of weather, from wind and rain to snow and more. You'll be glad to know that solar panels hold up well against hail, as found by the Department of.
