

Who should I sell my solar power to

Overview

By generating your own energy, not only can you save on your energy bills, you can also earn money through the Smart Export Guarantee (SEG) scheme by selling excess energy your panels produce back to your energy supplier. Most homeowners and businesses cannot directly sell electricity to the grid for cash. Selling power to the grid requires a registered electricity generator's license and qualified power-generating assets such as a natural gas plant, nuclear facility, or utility-grade solar farm. What is the Smart Export Guarantee?

How Does the SEG Actually Work?

Is the SEG Worth It?

How Much Can I Earn With the SEG?

The Forbes Home team considered 24 of the best solar companies and scored them across more than 75 data points, including availability, warranties and panel options. We also asked 1,000 home solar customers who made the switch in the last five years about their opinions to get a better idea of. This excess energy can be sold back to the grid, providing additional income and contributing to a more sustainable energy system. This blog will explain the concepts of net metering and feed-in tariffs, discuss factors influencing the value of electricity credits, and provide insights into. Harnessing the power of the sun through solar panels not only reduces your electric bill and decreases your carbon footprint but can also turn into a source of income.
